EDUCATION

BS Cybersecurity
University of Management & Technology,
Lahore
2024 – Present | Reg. F2024408017

FSc Pre-Engineering
Punjab Group of Colleges, Lahore
2022 – 2024

CORE STRENGTHS

- Production-Ready Development
- Secure Coding Practices
- REST API Design
- Database Design (SQL/NoSQL)
- Responsive UI/UX
- Cloud Deployment
- Problem Solving
- Team Collaboration

TECHNICAL SKILLS

LANGUAGES Python, JavaScript (ES6+), C++, HTML5, CSS3, SQL

BACKEND FastAPI, REST APIs, Node.js/Express, Auth & JWT

DATABASES PostgreSQL, Supabase, SQLite, Firebase Firestore

FRONTEND Responsive Design, Modern CSS, React basics

AI / AUTOMATION OpenAI API, Chatbot Design, WhatsApp AI (Wati)

DEVOPS Git, GitHub, Railway, Vercel, Render

CYBERSECURITY TOOLKIT

NETWORK Nmap, Wireshark, Burp Suite, Packet Tracer

DEFENSE Snort IDS, Windows Defender Firewall, SOC Monitoring

FRAMEWORK MITRE ATT&CK, OWASP Top 10, Information Assurance

PRACTICE TryHackMe & HackTheBox labs

PROFILE

Full-stack developer and BS Cybersecurity student building production web applications for clients across Pakistan's marketplace and services sector. Comfortable owning a build end to end — FastAPI and Python on the backend, modern JavaScript on the front end, PostgreSQL and Supabase for data, deployed and debugged on Railway and Vercel. Pairs that development background with hands-on security work — network scanning, IDS configuration, and SOC monitoring — and brings a security-first mindset to every application shipped. Currently deepening cybersecurity fundamentals through CCNA and CEH study while continuing freelance development work.

EXPERIENCE

Freelance Full-Stack Developer & AI Automation | Self-employed 2024 – Present

- Design, build, and deploy production web applications for clients, spanning marketplace platforms, government-style portals, and WhatsApp AI integrations.
- Own the full delivery cycle: requirements, database schema, API development, frontend build, deployment, and post-launch debugging.
- Apply a security-conscious approach to client work, including authentication design, input validation, and access control.

Cybersecurity Internship (Incoming) | CodeAlpha July 2026

- Accepted into a virtual cybersecurity internship focused on practical security tasks and hands-on tooling.

KEY PROJECTS

TradeHub PK — B2B Wholesale Marketplace 2025 – 2026

[Live](#) | [GitHub](#)

- Built a multi-vendor marketplace for Pakistan's textile sector for a real client, with a supplier directory, product listings, buyer/supplier dashboards, and an admin panel.
- Delivered a full UI/UX overhaul — glassmorphism, scroll-reveal animation, and live filtering — without touching the underlying backend logic.

TECH STACK FastAPI • PostgreSQL • HTML/CSS/JS • Railway • Vercel

Security Operations Center Lab 2026

- Configured a Windows Defender Firewall and Snort IDS lab and built a Streamlit dashboard to monitor and triage 864 logged alerts.
- Simulated and detected FTP brute-force, SYN flood, and Telnet attacks, mapping findings to MITRE ATT&CK with role-based access control on the dashboard.

TECH STACK Snort IDS • Windows Defender Firewall • Streamlit • Nmap • MITRE ATT&CK

Student Market Palace — Campus Marketplace 2025 – 2026

[Live](#) | [GitHub](#)

- Built a university buy-and-sell platform with edu-email-restricted signup, JWT authentication, and real-time product listings.
- Shipped a custom AI chatbot widget (Web Audio API, typewriter effects) and a knowledge base powering WhatsApp automation via Wati.

CERTIFICATIONS

Cyber Security: Understand Threats & Prevent Attacks — Alison

Information Security & Assurance — Coursework

Secure Network Configuration — Coursework

Currently Learning:

Cisco CCNA · Certified Ethical Hacker (CEH)

TECH STACK *FastAPI · Supabase/PostgreSQL · JWT · Railway · Vercel*

Brall Community — Heritage Platform 2025 – 2026

[Live](#) | [GitHub](#)

- Built a full-stack heritage and community site with a navy/gold brand identity, gallery, history sections, and a protected admin panel.

TECH STACK *FastAPI · Supabase · Railway*

Punjab Probation & Parole Department — Web Portal 2025

[Live](#) | [GitHub](#)

- Designed a government-style informational portal mockup with structured navigation and department-specific content sections.

TECH STACK *HTML · CSS · JavaScript · Vercel*

Hotel Booking Platform 2025

[Live](#) | [GitHub](#)

- Built and deployed a booking system on FastAPI and PostgreSQL, resolving production driver and templating issues during launch.

TECH STACK *FastAPI · PostgreSQL · Vercel*

Full-Stack Chat App 2025

[GitHub](#)

- Real-time messaging app with bidirectional contact requests and unread-message badges built on Firestore.

TECH STACK *Firebase · JavaScript*

RBAC Library Management System 2024

[GitHub](#)

- Role-based access control simulation for a library system in Python/SQLite, validated with a 55-assertion test suite.

TECH STACK *Python · SQLite · RBAC*
